Release Notes

Future Enhancements

Links to Drafts (Release 2019-01-31)
Clicking a link to a draft that has been published will no longer create a new draft.

Future Announcements

Contextual Help Touchpoints (release date to be announced)
The `mt-f1=true` URL query parameter that is included in Contextual Help Touchpoints page requests will be changed to `mt-view=f1`. Please contact the Support Team with any questions regarding this change.

Release 2019-01-24

Announcements

F1 Contextual Help Removal
Any F1 Contextual Help integrations that have been built using the https://cdn.mindtouch.us/f1.js domain will no longer load. This does not affect Contextual Help Touchpoint integrations.

Fixes

Search Report
Fixed an issue where an error message would appear for admin users in /Special:SearchReport.

Dashboard
Fixed multiple link tooltips in the Dashboard.

Custom Help Link
Fixed an issue where the Custom Help Link button would not use the configured URL. This issue was limited to MindTouch 4 (MT4).
Restrict Access Icon
Fixed an issue where the Restrict Access icon would not display the correct image. This issue was limited to MindTouch 4 (MT4).
