MindTouch provides multiple ways to import, export, move, delete, and restore content.

- Copy a page
- Export and Import MindTouch Content and Data
- Export and Import MindTouch MTARC files (legacy method)
- Import content from other systems
- Move a page
- Restore deleted pages

- Subscriptions and Notifications

Pro Members can subscribe to pages or sections to receive notifications of changes.
• Change your page subscriptions
• Manage subscriptions and page notifications (MT4)
• Notifications
• Subscribe to drafts
• Subscribe to pages

• Link Management

Link behavior in MindTouch includes features to dynamically update links and detect broken links.

• Content IDs for dynamic external links
• Link Manager
• Link scrolls on current page instead of going to linked page
• Page redirects in MindTouch
• Page Titles and URLs

• Content Quality

Feedback can identify areas for improvement in your MindTouch content.

• Article ratings and feedback
• Community engagement
• Content gaps
• Content quality checklist
• Incorporate customer feedback into your content workflow
• Set up a feedback knowledge queue in Salesforce
• Social discussion
