3.2 - MindTouch Paths

Organize a group of pages into a custom order with MindTouch Paths.

► Video: Create a Path
► Video: Add a Path to a page
► Video: Add a Path to a Guide Tab

The MindTouch self-organizing content framework structures your articles in a logical hierarchical order so that finding and relating information is easier.

- But what happens when you have a user story that doesn't quite fit into a hierarchy structure?
- What do you do when you need to tell a story based on a persona or on very specific sequences of actions?
- Paths allow you to gather and order articles that live anywhere on your site to drive a focused, intended result WITHOUT having to duplicate content.

What better way to teach you how to create and use a Path, than through a Path:

**Create a MindTouch Path**

Follow this path step-by-step to create a MindTouch Path experience for your users.

Pages: 10

- **Best practices for creating MindTouch Paths**
  Build your MindTouch Paths with maximum usability.

- **Create a MindTouch Path**
  Create a new MindTouch Path with Path Manager.

- **Add a MindTouch Path to a guide**
  Display a MindTouch Path on a Guide tab.

- **Add a MindTouch Path to a page**
  Add a Path to any MindTouch page.

- **Automatically Expand Path on a page**
  Customize a Path to automatically expand and show pages within the Path.

- **Edit a MindTouch Path**
  Edit a MindTouch Path in Path Manager.
- **Revert to a previous version of a path**
  View and revert to previous revisions of your MindTouch Path.

- **Change the URL of a MindTouch Path**
  A MindTouch Path name cannot be changed after saving, but you can copy an existing path and save it with a new name.

- **Delete a MindTouch Path**
  Delete a MindTouch Path from your site.
