MindTouch Editor

The MindTouch editor is a WYSIWYG text editor that allows authors to:

- Format text and paragraphs
- Insert tables and media
- Reuse content
- Add CSS, DekiScript and JavaScript
- View the source code
- Insert hyperlinks
- Add paths
- Apply templates

The editor is revealed when you create a new page OR edit a page.

- Editor Tools

Open any page in Edit Mode to access the MindTouch Editor tools.

- Add code blocks
- Add or remove a hyperlink
- Anchor links
- Toolbar Buttons
- Editor Comments
- Editor Widgets
- Edit a page
- Edit a section
- Expandable definition list
- Find and replace text in a page
- Fix overlapping lists and floating content
• Footnotes
• Insert content template
• JavaScript
• Keyboard shortcuts
• Line spacing
• Lists
• Toolbar Menu Options
• Red horizontal line in MindTouch editor
• Spell check as you type
• Syntax Highlighter with <pre> format

• Tables

MindTouch automatically creates responsive tables when tables are added to a page.

• About responsive tables
• Add and edit tables (TCS)
• Add a table
• Align content in table cells
• Edit table properties
• Increase user engagement through responsive tables
• Make your tables responsive
• Merge and unmerge table cells
• Resize table columns
