Integrations

Touchpoints | CRM Integrations | Marketing Tools | API Documentation | Legacy Integrations

Extend your MindTouch content into other web systems: CRM, ticketing, company website, e-commerce, automated marketing, and more. At the center of Mindtouch integrations is a set of connectors we call Touchpoints. In addition, our open API is available for developers to further customize options to surface MindTouch content.

Custom integrations

For guidance to connect marketing tools or web analytics (Pardot, Eloqua, Marketo, Google Analytics, Adobe Analytics, etc.), contact your Customer Success Manager or get Expert Help through MindTouch Professional Services.

Get expert help

- Touchpoints

Touchpoints are integrations that extend your MindTouch content to embed within any web property, e-commerce pages, web forms, community forums, social channels, inside your application or product, and more.

- Brand your Touchpoints
- Create, configure, and embed Touchpoints
- Edit, deactivate, and delete Touchpoints
