Authoring

MindTouch Editor | Page Layout | Workflow | Reuse Content | DekiScript

- MindTouch Editor

The MindTouch editor is a WYSIWYG editor that automatically creates HTML from visual authoring.

- Editor Tools
- Tables
- Files and Media

- Layout Options

New Pages via Templates | Customize Pages | Table of Contents

- New Pages
- Table of Contents (TOC)
Custom Elements

• Authoring Process

Configure authoring processes and manage content drafts.

◦ Authoring roles
◦ Draft authoring
◦ Edit Summary
◦ Find total number of pages on a site
◦ Implement a content workflow
◦ Page element revert rules
◦ Revision History
◦ Server Error Message

• Capture Manager

The Capture Manager solution for MindTouch enables additional content publishing options.

◦ Classifications in Capture Manager
◦ Draft alternatives
◦ Flag process in Capture Manager
◦ Implementation strategy for Capture Manager
◦ New Page Templates in Capture Manager
◦ Permissions by Role in Capture Manager
• **Reuse content**

Use existing content, either an entire article or sections of an article, in another location of your site.

  ◦ Display titles of reused sections
  ◦ How to reuse content
  ◦ Permissions for content reuse
  ◦ Reused page not loading

• **DekiScript**

DekiScript is a MindTouch proprietary programming language to create custom objects in your MindTouch site.

  ◦ Access Page ID on a page with DekiScript
  ◦ Add DekiScript to a page
  ◦ Build a widget to display file attachments
  ◦ Display content only on a page with specific tag
  ◦ Create custom conditional content groups
  ◦ Date functions
  ◦ Definitions and Operators in DekiScript
  ◦ DekiScript 101
  ◦ Dynamic controls
  ◦ Errors in DekiScript
  ◦ Exclude pages from the popular pages list
  ◦ If statements in DekiScript
  ◦ JSON functions
  ◦ Learn to use DekiScript
  ◦ List and map elements in DekiScript
- List functions
- Map functions
- Media extension
- Meta functions
